Delhi, India | ahmadkaab4@gmail.com | LinkedIn: linkedin.com/in/ahmad-kaab-bb435430 | GitHub: github.com/ahmadkaab | Portfolio: ahmadkaab.github.io

PROFESSIONAL SUMMARY

Entrepreneurial BCA student and full-stack builder focused on web development, digital growth, AI integration, and automation. Experienced in designing and deploying responsive, SEO-friendly websites, building practical digital products, and growing online audiences through data-driven content strategies. Combines technical problem-solving with business-oriented thinking to turn ideas into useful digital solutions.

CORE SKILLS

Web Development: HTML, CSS, JavaScript, responsive design, website deployment

Digital Marketing: SEO, keyword research, content optimization, social media marketing, Meta Ads

Development: Python, C/C++, Flutter, Telegram API, Git, AI-assisted programming

AI & Automation: Gemini API, prompt engineering, rapid prototyping, workflow automation

Cybersecurity: Burp Suite, Nmap, Linux CLI, vulnerability identification

Tools: Microsoft Office, CapCut, OBS Studio

EXPERIENCE

Freelance Web Developer

Self-Employed | Freelance

- Designed, developed, and deployed multiple niche websites from concept to launch.
- Built responsive, SEO-optimized websites with a focus on usability, performance, and practical business requirements.
- Worked across web design, development, content structure, and online presence improvements.

Digital Growth Strategist

Self-Employed | Independent

- Scaled an Instagram meme page to more than 1.6 million impressions through viral content strategy.
- Grew a YouTube channel to 25K views and 200+ subscribers in fewer than 50 videos.
- Applied SEO, keyword research, content optimization, and audience-focused creative strategy to improve digital reach.

Cybersecurity Intern

Secure Strike | 2024 | 8 weeks

- Conducted web security assessments and vulnerability identification using Burp Suite and Nmap.
- Performed network scanning and troubleshooting in Linux command-line environments.
- Worked with common web application vulnerabilities and security-audit workflows.

LEADERSHIP & INITIATIVES

Founder & Manager

Team FALAH (BGMI Esports) | 2 years

- Managed operations and strategy for a competitive 4-player esports roster.
- Coordinated recruitment, tournament participation, team logistics, and community engagement.

SELECTED PROJECTS & PRODUCTS

ScaleFlow — Autonomous Content Pipeline: Built an end-to-end Python and Gemini API workflow for niche research, content generation, and marketing asset creation; reduced content production time by 90%.

AI eBook Generator — ebookbazar.shop: Architected an AI platform that autonomously generated 50+ formatted digital products in PDF/EPUB formats.

Roster Up — Mobile App: Developed a Flutter MVP for the esports ecosystem, helping BGMI players discover competitive teams.

Pantry Pal — Mobile App: Built a Flutter inventory-management MVP with an AI recipe engine that generates meal ideas from available ingredients.

OSINT Telegram Bot: Programmed a Python automation bot using Pandas and the Telegram API for OSINT lookups from local databases and web sources.

Algorithmic Trading Bot: Engineered a CCXT-based trading script using an SMA crossover strategy with exchange API key management and execution handling.
